

# ENGLISH FOR PROFESSIONALS

Express yourself better in English | Be confident in professional situations |  
Reach desired business objectives

## NDA English for Professionals course

NDA Communications offers weekly classes in all levels, from beginner to advanced, helping you to express yourself freely whether it's to improve your conversational level or to feel more confident in your profession to get you to the next level in a international business environment.

### What is different about the NDA approach and how it will help you reach your objectives?

The difference between a standard English course and the NDA EFP approach is that it's specifically directed to help you and your employees optimize English skills based on specific needs in an increasingly international environment; such as helping you feel more secure expressing yourself in meetings, increased confidence when giving presentations, in customer interactions and more importantly; a course adaptable to your objectives and areas of desired improvement.

## Combined techniques to get you where you need to go

Instead of just going through the "old schoolbook" way of learning English, we combine grammar and vocabulary support with an NDA approach that includes elements of rhetorics, expression control methods and phonetic awareness techniques in customized classes to help you improve where it really will help you achieve your goals.

*Invest in your employee's communication skills and help them represent better and achieve higher objectives*
